

RISK POLICY

1.1. The information provided on this website is for reference purposes only and should not be construed as an offer or solicitation to purchase or sell any security. It is important to note that the material presented on this website does not constitute a recommendation that any investment is suitable for any individual. We strongly advise that anyone considering making an investment decision consult with their financial or legal advisor beforehand.

1.2. It is crucial to understand that trading goods, commodities, currencies, including cryptocurrencies and digital tokens, carries a significant level of risk. The price of virtual currencies and tokens can be highly volatile, subject to sudden and extreme price swings, and their value is not permanent. Cryptocurrency may experience sharp fluctuations in value and may even become worthless, resulting in a complete loss of assets. It is important to remember that price bubbles or loss of confidence can cause a collapse in demand relative to supply.

1.3. All visitors to our website should note that any opinions, news, research, analyses, or other information provided on this website are general market commentary and do not constitute investment advice. It is essential to educate oneself about cryptocurrencies before engaging in buying or selling them.

1.4. Please note that none of the information provided on this website is intended to form the basis for any investment decision, and no specific recommendations are intended. We explicitly disclaim any and all responsibility for any direct or consequential loss or damage of any kind whatsoever arising directly or indirectly from:

- a) Reliance on any information contained on this website, any error, omission, or inaccuracy in any such information; or any action resulting from such information.**
- b) Cryptocurrencies are not backed by any government or central institution and their price depends on trust, development of the technology, as well as free-market mechanisms of supply and demand. Therefore, it is essential to fully understand the risks associated with investing in cryptocurrencies.**
- c) Cryptocurrency transactions are irreversible, and any errors made during the transaction cannot be reversed. We execute orders according to the instructions provided by you, and we will not be liable for executing transactions according to incorrect instructions.**
- d) Taxation policies related to cryptocurrencies are uncertain, and you**

must seek tax advice regarding your activities with us. Tax implications may result in adverse tax consequences, including withholding taxes, income taxes, and tax reporting requirements.

e) Our platform may suffer from hardware or software failures, as well as disruptions, errors, distortions, or delays in payments and trading due to internet connectivity issues. We do not assume any responsibility for any such issues.

Please note that there may be additional risks associated with investing in cryptocurrencies that we have not foreseen or identified on our website, and it is your responsibility to acknowledge and recognize them.

1.5. Users of our website must be aware that the cryptocurrency market is largely unregulated and that there is no governmental or regulatory body that supervises or guarantees its functioning. As a result, cryptocurrency exchanges and trading platforms are subject to a high level of risk and volatility that may be influenced by various factors, including regulatory changes, market manipulation, security breaches, and cyber-attacks. Moreover, cryptocurrencies are not backed by any tangible asset or reserve and their valuation is based solely on supply and demand dynamics.

1.6. It is important to note that cryptocurrency transactions are irreversible, which means that once a transaction is confirmed on the blockchain, it cannot be reversed or cancelled. Therefore, it is crucial to verify the accuracy of transaction details, such as the recipient address and amount, before sending any cryptocurrency. Cryptocurrency transactions also require a certain amount of network fees, which can vary depending on the network congestion and market conditions. As such, users should take into consideration these fees when conducting transactions and ensure that they have enough funds to cover them.

1.7. Our platform has implemented various security measures to safeguard our users' assets, including secure storage solutions and two-factor authentication. However, users must also take responsibility for securing their accounts and private keys by using strong passwords and enabling additional security features, such as email or mobile notifications for account activity. In addition, users should also be aware of phishing scams and other fraudulent activities that may attempt to steal their login credentials or other sensitive information.

1.8. Trading cryptocurrencies and digital tokens involves a high level of

technical knowledge, expertise, and skill. It is your responsibility to ensure that you have sufficient knowledge and expertise in cryptocurrency trading before using our platform. Lack of knowledge and understanding of the platform and its features may lead to unexpected losses. We encourage you to research and understand the technology, security, and best practices for handling cryptocurrency.

1.9. Users should also be aware of the tax implications of trading and holding cryptocurrencies. The tax treatment of cryptocurrencies may vary depending on the jurisdiction, and users should seek professional tax advice to understand their obligations and potential liabilities. Failure to comply with tax laws and regulations may result in penalties or legal actions against the user.

1.10. Users should be aware that investing in cryptocurrencies involves a high level of risk and may not be suitable for everyone. Users should carefully consider their financial situation, investment objectives, and risk tolerance before investing in any cryptocurrency. Past performance is not indicative of future results, and the value of cryptocurrencies may fluctuate widely and rapidly. Therefore, users should only invest what they can afford to lose and should never invest borrowed funds or funds that are needed for other essential purposes.
